Errors og Warnings ved CreateGoodReceival og CreatePickOrder

Beskederne er ikke 1:1 med responsen i API'et, da de i responsen vil referere til det specifikke input data som API-kaldet er lavet med.

CreateGoodsReceival

Ved oprettelse af GoodsReceival.

Errors:
- E0012 - Order number not available. Used on another goods receival.

Ved oprettelse af GoodsReceivalLines. Disse kan også forventes ved AddGoodsReceivalLines.

Errors:
- E0010 - No goods receival lines found in input data (Denne forekommer kun ved AddGoodsReceivalLines)
- E0011 - Unable to create any goods receival lines. See process details.

Warnings:
- W0000 - Goods receival lines added with warnings. One or more lines not added. See process details.
- W0001 - No goods receival with GoodsReceivalId found. Goods receival line is not added to any goods receival.
- W0002 - Goods receival with GoodsReceivalId is finished/closed. Goods receival line is not added to any goods receival.
- W0003 - GoodsReceivalId is required, but missing. Goods receival line with is neither added to any goods receival.
- W0004 - Goods receival line with the given ProductID (or ProductBarcodeId if secondary barcodes are used) not added to goods receival with the given GoodsReceivalId because a goods receival line with the given ExtReference already exists.
- W0009 - Goods receival line with the given ProductID (or ProductBarcodeId if secondary barcodes are used) not added to goods receival with the given GoodsReceivalId because no product was found with the given ProductId.
- W0011 - Goods receival line with the given ProductID not added to goods receival with the given GoodsReceivalId because no product with the given ProductId was found, and secondary barcodes are not allowed.
- W0014 - Goods receival line with the given ProductID (or ProductBarcodeId if secondary barcodes are used) not added to goods receival with the given GoodsReceivalId because no product was found, and secondary barcodes are not allowed.
- W0015 - Goods receival line with the given ProductID (or secondary barcode with ProductBarcodeId if use of secondary barcodes on products are used) not added to goods receival with the given GoodsReceivalId because the product is not active.
- W0016 - Goods receival line with the given ProductID (or ProductBarcodeId if secondary barcodes are used) not added, because the product with the given ProductId is not traceable and traceability value BatchExpected is set.

- W0017 - Could not validate the given traceablitity value BatchExpected for goods receival line with the given ProductID (or ProductBarcodeId if secondary barcodes are used) because no product was found.
- W0018 - Goods receival line with the given ProductID (or ProductBarcodeId if secondary barcodes are used) not added, because the product is not traceable and traceability value BestBeforeExpected date is set.
- W0019 - Could not validate the given traceablitity value BestBeforeExpected date for goods receival line with the given ProductID (or ProductBarcodeId if secondary barcodes are used) because no product was found.
- W0020 - An existing goods receival line also has the given ProductId and given BestBeforeExpected date, but a different BatchExpected, which is not allowed. Therefore goods receival line with the given ProductID is not added.
- W0021 - Another goods receival line in the given input data also has the given ProductId and the given BestBeforeExpected date but a different BatchExpected, which is not allowed. Therefore goods receival line with ProductId is not added
- W0048 - Goods receival line with the given ProductID (or ProductBarcodeId if secondary barcodes are used) not added to goods receival with the given GoodsReceivalId because one or more of the goods receival lines in input data has the same ExtReference.

Disse vil kun forekomme hvis det er tilladt at benytte alternative stregkoder til produkter.
- W0005 - No secondary barcode with the given ProductBarcodeId found therefore secondary barcode id can not be used.
- W0006 - Secondary barcode with ProductBarcodeId is not active, alternative active barcode found, therefore secondary barcode id is changed to the alternvative active ProductBarcodeId.
- W0007 - No secondary barcode with the given ProductBarcodeId, and no alternative active barcode found, therefore secondary barcode id can not be used.
- W0008 - Goods receival line with the given ProductID and ProductBarcodeId not added to goods receival with the given GoodsReceivalId because the secondary barcode does not belong to the product with the given ProductId. (Vil kun forekomme hvis man benytter både ProductId og ProductBarcodeId i samme linje).
- W0010 - Goods receival line with the given ProductID (or ProductBarcodeId) not added to goods receival with the given GoodsReceivalId because no product with either the given ProductId or the given ProductBarcodeId was found
- W0012 - Goods receival line with the given ProductBarcodeId not added to goods receival with the given GoodsReceivalId because no product was found with a secondary barcode which has
- the given ProductBarcodeId.
- W0013 - Goods receival line with the given ProductBarcodeId not added to goods receival with the given GoodsReceivalId because no secondary barcode with the given ProductBarcodeId was found and therefore no product was found.

Ved oprettelse af GoodsReceivalProperties. Disse kan også forventes ved AddGoodsReceivalProperties.

Errors:
- E0000 - Goods receival line properties not added, because it already exists.
- E0001 - No goods receival line found with either the given GoodsReceivalLineId, or ReceivalNumber and ExtReference. Therefore goods receival line properties is not added.
- E0002 - Goods receival with the given GoodsReceivalLineId, therefore goods receival line properties is not added.
- E0003 - Goods receival line with the given GoodsReceivalLineId is finished. Therefore goods receival line properties is not added.
- E0004 - Goods receival line with GoodsReceivalLineId is not part of goods receival with ReceivalNumber. Therefore goods receival line properties is not added.
- E0005 - ExtReference does not match with the given ExtReference on goods receival line with the given GoodsReceivalLineId. Therefore goods receival line properties is not added.
- E0006 - Goods receival line with the given ReceivalNumber and ExtReference not found, therefore goods receival line properties is not added.
- E0007 - The given PropertyType is not allowed, only 1 is allowed. If you want to use a new type, please contact PRIME CARGO A/S
- E0008 - The CurrencyCode is not allowed, only 'USD' is allowed. Please make sure prices are in USD and CurrencyCode is 'USD'. Goods receival line properties with is not added.

Denne kan forekomme for hver property i GoodsReceivalProperties, og vil kun forekomme hvis man har flere linjer med præcis samme produkt på samme ordre, men hvor den enkelte property i GoodsReceivalProperties ikke er den samme i GoodsReceivalProperties for alle de omtalte linjer med præcis samme produkt i samme ordre.
- E0009 - The given property input value is not the same as property value on the other line properties for lines with same product and on the same receival. Goods receival line properties is not added.

CreatePickOrder

Ved oprettelse af PickOrder.

Errors:
- E0013 - The given OrderNumber is not available. Used on another order.
- E0014 - There is no sub owner with the given SubOwnerId, belonging to your owner.
- E0015 - There is no sub owner address with the given SubOwnerAddressId under sub owner with the given SubOwnerId.
- E0016 - No order type with the given OrderTypeId found.
- E0017 - No wave with the given WaveId found. (Bruges til "puljepluk", så flere ordrer kan plukkes samtidigt)
- E0018 - Cannot add pick order to wave with the given WaveId because the wave has already been released.
- E0019 - It is not possible to add an order with the given OrderTypeId to the wave with the given WaveId because a different order type is in the wave, and only one order type is allowed pr. wave
- E0020 - There is no C6 language with the given LCID, must be (1030 = Danish, 1031 = German (Germany), 1033 = English (United States) or NULL.
- E0021 - No country with the given CountryId found.
- E0022 - You must provide a ReceiverZip. ReceiverZip can only be ommitted when CountryId is 372 (Ireland).
- E0023 - No shipping product with the given ShippingProductId found.
- E0024 - No country with the given CollectCountryId found.
- E0025 - Collect-(name, Address, City, Country) is not set. All Click & Collect data is rquired to use Click & Collect. Either set collect data or remove all Click & Collect data.
- E0027 - No state with the given StateId found for the given country (country name, ID, Code).
- E0062 - No shop with the given ShopId was found.

Warnings:
- W0022 - USStateId set to null, because no state with the given StateId was found for the given country (country name, ID, Code).
- W0023 - CustomsStatus changed to 0 because the given CustomsStatus is not allowed. Only 0 or 1 and 2 is allowed. (1 or 2 is only allowed in agreement with PRIME CARGO A/S)

Ved oprettelse af PickOrderHeaderProperties. Disse kan også forventes ved AddPickOrderHeaderProperties.

Errors:
- E0029 - Pick order with tht given PickOrderHeaderId not found therefore pick order properties with the given PickOrderHeaderId is not added
- E0030 - Pick order properties with the given PickOrderHeaderId not added, because it already exists

Ved oprettelse af PickOrderLines. Disse kan også forventes ved AddPickOrderLines.

Errors:
- E0044 - No pick order lines found in input data (Denne kan kun forekomme ved AddPickOrderLines).
- E0045 - Unable to create any pick order lines. See process details.

Warnings:
- W0024 - Pick order lines added with warnings. One or more lines not added. See process details.
- W0025 - No pick order with the given PickOrderHeaderId found. Pick order line with the given ProductId (or ProductBarcodeId if use of alternative barcodes on products is allowed) is not added to any pick order
- W0028 - Pick order line with the given ProductId (or ProductBarcodeId if use of alternative barcodes on products is allowed) not added to pick order with the given PickOrderHeaderId because a pick order line with the given ExtReference already exists.
- W0033 - Pick order line with the given ProductId not added to pick order with the given PickOrderHeaderId because no product with the given ProductId was found.
- W0035 - Pick order line with the given ProductId (or ProductBarcodeId if use of alternative barcodes on products is allowed) not added to pick order with the given PickOrderHeaderId because no product was found from product id, and secondary barcodes are not allowed.
- W0038 - Pick order line with the given ProductId (or ProductBarcodeId if use of alternative barcodes on products is allowed) not added to pick order with the given PickOrderHeaderId because no product was found secondary barcodes not allowed
- W0039 - Pick order line with the given ProductId (or ProductBarcodeId if use of alternative barcodes on products is allowed) not added to pick order with the given PickOrderHeaderId because the product with the given ProductId (or secondary barcode with ProductBarcodeId if use of alternative barcodes on products is allowed) is not active.
- W0040 - Pick order line with the given ProductId (or ProductBarcodeId if use of alternative barcodes on products is allowed) not added, because the product with the given ProductId is not traceable and traceability property BatchRequested is set.
- W0041 - Could not validate the given traceablitity value of property BatchRequested, for pick order line with the given ProductId (or secondary barcode with ProductBarcodeId if use of alternative barcodes on products is allowed) because no product was found.

Disse forekommer kun hvis alternative stregkoder benyttes.
- W0029 - No secondary barcode with the given ProductBarcodeId found, therefore secondary barcode id can not be used.
- W0030 - Secondary barcode with the given ProductBarcodeId is not active, ProductBarcodeId for an alternative active barcode was found therefore ProductBarcodeId is changed to the ProductBarcodeId of the alternative active barcode.
- W0031 - No active secondary barcode with the given ProductBarcodeId was found and no alternative active barcode was found therefore ProductBarcodeId can not be used.
- W0032 - Pick order line with the given ProductId and ProductBarcodeId not added to pick order with the given PickOrderHeaderId because ProductBarcodeId does not belong to the product with the given ProductId.

- W0034 - Pick order line with the given ProductId and ProductBarcodeId not added to pick order with the given PickOrderHeaderId because no product with either the given ProductId or ProductBarcodeId was found.
- W0036 - Pick order line with the given ProductBarcodeId not added to pick order with the given PickOrderHeaderId because no product with secondary barcode which has the given ProductBarcodeId was found.
- W0037 - Pick order line with the given ProductBarcodeId not added to pick order with the given PickOrderHeaderId because no secondary barcode with the given ProductBarcodeId was found and therefore no product was found.

Disse forekommer kun ved AddPickOrderLines.
- W0026 - PickOrderHeaderId is required. Pick order line with the given ProductId (or ProductBarcodeId if use of alternative barcodes on products is allowed) is not added to any pick order. PickOrderHeaderId missing.
- W0027 - Pick order line the given ProductId (or ProductBarcodeId if use of alternative barcodes on products is allowed) and PartDescription not added to pick order with the given PickOrderHeaderId because pick order is processed.

Ved oprettelse af PickOrderLineProperties. Disse kan også forventes ved AddPickOrderLineProperties.

Errors:
- E0039 - Pick order line properties with the given PickOrderLineId not added because SalesPrice is not set, and the pick order with the given PickOrderHeaderId requires it to be set for customs purposes (CustomsStatus of the pick order with the given PickOrderHeaderId).
- E0040 - Pick order line properties with the given PickOrderLineId not added because SalesCurrencyCode and the pick order with the given PickOrderHeaderId requires it to be set for customs purposes (CustomsStatus of the pick order with the given PickOrderHeaderId).
- E0041 - Pick order line properties with the given PickOrderLineId not added because the given OriginCountryAlpha is unknown.
- E0042 - Pick order line properties with the given PickOrderLineId not added because OriginCountryAlpha is not set and the pick order with the given PickOrderHeaderId requires it to be set for customs purposes (CustomsStatus of the pick order with the given PickOrderHeaderId).
- E0043 - Pick order line properties with the given PickOrderLineId not added because MeasureCode is not set and the pick order with the given PickOrderHeaderId requires it to be set for customs purposes (CustomsStatus of the pick order with the given PickOrderHeaderId).

Disse vil kun forekomme ved AddPickOrderLineProperties
- E0031 - Pick order line properties with the given PickOrderLineId not added. No pick order line with the given PickOrderLineId found.
- E0033 - Pick order line properties with the given PickOrderLineId not added. The pick order with the given PickOrderHeaderId is processed.
- E0035 - Pick order line properties with the given PickOrderLineId not added. The pick order line with the given PickOrderLineId is closed.

- E0037 - Pick order line properties with the given PickOrderLineId not created because properties for the line with the given PickOrderLineId already exists.
